**DETAILED ACTION**

1. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 119(e) as follows:

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)).

2. The references filed with the IDS on 13 July 2001 are no longer matched with the file or were lost during mailing. The examiner has considered the U.S. patent references listed and crossed out reference to the non-patent literature on the 1449. If applicant supplies copies of the listed non-patent literature, the 1449 will be revised to indicate that the references have been considered.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1772

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dillon et al. (U.S. 3,746,605).

Dillon et al. teaches molded impact elements on both sides of a flexible porous sheet (abstract and Figure 4) with the sheet passing through the middle of elements, which are joined through the sheet. Molding to shape and join the impact absorbing elements to the flexible sheet is taught in the Example starting in column five. The instant invention claims variation in the size and shape of the elements and the material of their construction. Selection of polymeric material and size of the projections is taken as being within the skill of the art depending on the impact to be absorbed.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1772

6. Claims 1, 20-21, 29 and 34-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Dillon et al. (U.S. 3,746,605).

See the above section for a description of the teachings of the reference.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 703-308-2420. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one business day unless an extended absence is noted on his voice mail greeting.
